

## QUARTERLY NEWSLETTER

Welcome to the Q3 NEWSLETTER – a quarterly roundup of **latest product news and stories** from across VTI Instruments, an AMETEK Programmable Power brand.

### Latest products news

#### VTI Instruments firmware and software updates

New firmware 1.16.11 for SMX switching cards

[Download SMX Firmware v1.16.11](#)

#### VTI Instruments datasheet and product manual updates

New product manual of SMX switching cards

[Download SMX switching Card Product Manual](#)

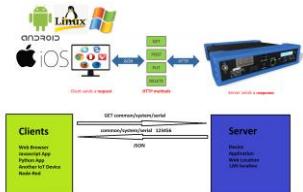

#### VTI Instruments new white paper!

Learn more about AMETEK Programmable Power and VTI instruments Data Acquisition solution for university research

## Around AMETEK VTI Instruments

### VTI Instruments – Success Story

We are pleased to present a recent collaboration with Advanced Kinetics and Technology Solutions (AKTS), a leader in advanced thermal analysis and kinetics.

AKTS solutions are widely used in research and industry to simulate, predict and optimize the thermal stability and degradation behavior of materials. Therefore, this application required highly precise data acquisition instrument that must be integrated into a Delphi software environment. The RESTful API of the EX1400 enables seamless communication, allowing for real-time, accurate data acquisition.

This successful integration demonstrates how AKTS's deep scientific expertise combined with state-of-the-art instrumentation can deliver exceptional accuracy and efficiency in thermal process analysis.
